Cleansing the body, cleansing the mind - nomenclatures and practices of Pancakarma therapy in classical Ayurveda and in contemporary Europe

<https://commons.wikimedia.org/:vecteezy.com>

This is a forum for students, researchers, and everyone who is interested in the study of health and illness in different cultural/social settings. We host senior students and scholars who present their current research projects. The aim is to discuss and analyze new theories and themes of medical anthropology and to learn more about international developments in the area of culture, health, and healthcare.

In order to obtain credit points, students have to participate virtually in the lectures and write a 1-2 page summary of four of the lectures. For further information please contact Lin Nagels: lin.nagels@sai.uni-heidelberg.de
